SUMMARY

Software Engineer with **2+ years** building production-grade **Java microservices**, **AI-powered tools**, and full-stack platforms at Capgemini. Experienced in **Spring Boot**, **Apache Kafka**, **gRPC**, **GraphQL**, **AWS OpenTelemetry (ADOT)**, and containerised CI/CD pipelines. Strong in **low-level design (LLD)**, design patterns, and shipping products end-to-end. AWS Certified Cloud Practitioner · Azure AZ-900.

TECHNICAL SKILLS

Languages	Java (17/21/25), Python, Golang, JavaScript, SQL
Frameworks	Spring Boot, Spring Cloud, Spring for GraphQL, React.js, Node.js, Hibernate, JPA
APIs & Protocols	REST, gRPC, GraphQL
AI / ML	LLM Integration (Gemini AI, OpenAI), AI Agents, Prompt Engineering
Cloud & DevOps	AWS (EC2, EKS, Lambda, S3, Secrets Manager, X-Ray, CloudWatch), AWS ADOT, Docker, Kubernetes, GitLab CI/CD, Nginx
Databases	PostgreSQL, MySQL, Redis, MongoDB
Messaging	Apache Kafka, RabbitMQ
Architecture	Microservices, Event-Driven, LLD, Design Patterns, System Design
Observability	AWS Distro for OpenTelemetry (ADOT), Distributed Tracing, AWS X-Ray, CloudWatch
Tools	Git, Maven, Gradle, Postman, Swagger, Linux, Agile/Scrum

PROFESSIONAL EXPERIENCE

Capgemini (Charter Communications)

Apr 2024 – Present

Senior Analyst – Software Engineer

Bengaluru, India

- Built custom AI agents to refactor legacy codebases to **Java 21/25** standards — cut upgrade effort by **60%** and accelerated migration timelines across client projects.
- Created an AI-powered engineer onboarding tool covering architecture walkthroughs and dev environment setup — reduced ramp-up time by **45%**.
- Designed new **Java microservices** from scratch using **LLD** principles (Factory, Strategy, Observer) — services handle **10K+ req/min** in production.
- Extended legacy **Golang** telemetry services with a **gRPC** interface — throughput up **60%**, p99 latency reduced to **12 ms**.
- Instrumented the microservices fleet with **AWS Distro for OpenTelemetry (ADOT)** — distributed traces, metrics, and logs shipped to **AWS X-Ray + CloudWatch**; MTTR cut by **50%**.
- Exposed a **GraphQL** API layer over existing REST services (Spring for GraphQL) — eliminated over-fetching and reduced API round-trips by **35%**.
- Built **Kafka** pipelines with retry logic and dead-letter queues — message failure rate under **0.01%**.
- Designed REST APIs on **AWS EC2/EKS** with Secrets Manager for credential handling and rate limiting for production traffic.
- Set up **Docker + GitLab CI/CD** pipelines — deployment time cut by **40%**, rollbacks made frictionless.

Tech Stack: Java 17/25, Spring Boot, Golang, gRPC, GraphQL, AWS ADOT / X-Ray / CloudWatch, Apache Kafka, AWS (EC2, EKS, Secrets Manager), Docker, GitLab CI/CD, PostgreSQL

- Worked with fintech teams to design backend specs and data flows for scalable banking systems.

Tech Stack: Python, SQL, REST APIs, Git

PROJECTS

InterviewPal — AI Mock Interview & ATS Resume Tool

[Live Demo](#)

- Full-stack platform with **React + Java Spring Boot** — parses resumes, scores ATS compatibility, and runs mock interviews via **Gemini AI**.
- Deployed on **AWS EC2** behind **Nginx** with TLS — **99.5%** uptime, handles **500+ concurrent users**.
- Automated **Docker** CI/CD — zero-downtime deployments on every push.

Tech Stack: Java, Spring Boot, React, Gemini AI, AWS EC2, Nginx, Docker, PostgreSQL, JWT

Visual System Design Simulator

[Live Demo](#)

- **React + TypeScript** drag-and-drop canvas with **30+ components** (EC2, Redis, Kafka, CDN, etc.); Java Spring Boot REST API for designs, challenges (RPS/latency/budget), and prebuilt templates.
- Web-worker simulation engine computes load and traffic spikes off the main thread — UI stays smooth under heavy interaction.
- Includes cost estimator, reference solutions, and template loader for common patterns (URL shortener, chat system, etc.).

Tech Stack: Java, Spring Boot, React, TypeScript, Tailwind CSS, Docker, AWS EC2, Nginx

Theater Management System

[GitHub](#)

- Role-based booking platform (admin / manager / customer) with real-time seat inventory and concurrency control to prevent double-bookings under high traffic.

Tech Stack: Java, Spring Boot, MySQL, REST APIs, JWT, Thymeleaf

RFP Automation Platform

[GitHub](#)

- Automated RFP document generation and vendor scoring with Spring Boot — cut manual processing by **70%**.
- Modular template engine for dynamic PDF generation with customisable scoring criteria.

Tech Stack: Java, Spring Boot, PostgreSQL, REST APIs, PDF Generation, Docker

EDUCATION

Jain University

2021 – 2023

Master of Computer Applications (MCA)

Bengaluru, India

CGPA: **8.0 / 10** | Coursework: DSA, Database Management, OS, Software Engineering, Storage & Cloud Technology

St. Aloysius College

2018 – 2021

B.Sc. — Physics, Chemistry, Mathematics

Mangalore, India

CGPA: **8.9 / 10**

CERTIFICATIONS

- [AWS Certified Cloud Practitioner](#) — Amazon Web Services
- [Microsoft Certified: Azure Fundamentals \(AZ-900\)](#) — Microsoft Azure

ACHIEVEMENTS

- **Algorithm Arena** — **150+** DSA tutorials on YouTube ([@AlgorithmArena](#))
- **LeetCode** — Solved **500+** problems across DSA & algorithms ([Profile](#))
